
Publikationsverzeichnis Dr. med. Björn Christian Jürs

Neelsen LC, Riel EB, Rinné S, Schmid FR, Jürs BC, Bedoya M, Langer JP, Eymsh B, Kiper AK, Cordeiro S, Decher N, Baukrowitz T & Schewe M. 2024. Ion occupancy of the selectivity filter controls opening of a cytoplasmic gate in the K2P channel TALK-2. *Nature Communications*, 15, 7545 (Originalarbeit)

Riel EB*, Jürs BC*, Cordeiro S, Musinszki M, Schewe M & Baukrowitz T. 2022. The versatile regulation of K2P channels by polyanionic lipids of the phosphoinositide and fatty acid metabolism. *Journal of General Physiology*, 154 (2): e202112989 (Originalarbeit)

*geteilte Erstautorenschaft

Schewe M, Riel EB, Rinné S, Kopec W, Langer J, Lindemann P, Jürs BC, Nazaré M, de Groot B, Decher N & Baukrowitz T. 2021. Structural Basis for Gating of the Two-Pore Domain K⁺ (K2P) Channels TASK-1 and TALK-2. *Biophysical Journal*, 120 (3): 289a. (Vortrag)

Riel EB, Jürs BC, Langer J, Musinszki M, Cordeiro S, Rinné S, Decher N, Schewe M & Baukrowitz T. 2020. Characterisation of the Versatile Gating Behaviour in TALK-2 K2P Channels. *Biophysical Journal*, 118 (3): 269a (Poster)

Riel EB, Jürs BC, Langer J, Schewe M & Baukrowitz, T. 2019. A restricted QA⁺ blocker accessibility of TALK-2 K2P channels uncovers a structural constriction at the inner pore entrance. *7th Symposium of the Young Physiologists*, Nürnberg, 14.-15.03.2019 (Poster)

Jürs BC & Baukrowitz T. 2017. Regulation of K2P channels by acyl coenzyme A esters – Implications for a novel cardioprotective mechanism. *96th Annual Meeting of the German Physiological Society*, Greifswald, 16.-18.03.2017 (Poster)

Tegtmeier M, Schulz F, Schewe M, Musinszki M, Jürs BC, Cordeiro S & Baukrowitz T. 2016. Pharmacological activation of K2P channels. *95th Annual Meeting of the German Physiological Society*, Lübeck, 03.-05.03.2016 (Poster)

Jürs BC, Schewe M, Nematian E & Baukrowitz T. 2015. Novel insight into the regulation of TALK-2 (TASK-4) channels by membrane voltage, intracellular ions and pharmacological compounds. *94th Annual Meeting of the German Physiological Society*, 05.-07.03.2015, Magdeburg (Poster)
